Adding character to your home

Working to quality standards

CET assembles insulated glass units to exacting quality standards. Our skilled craftsmen recreate the original stained glass appearance using darkened lead as standard and colour-fast UV filtered coloured film. Bevel designs also provide an added dimension, allowing natural light to move and sparkle, enhancing the appearance of your windows, doors and conservatory.

From our locations in Northampton and Portsmouth each design is made and delivered to our customers requirements.

We also offer a bespoke service, so please challenge our designers and speak to us if you wish to create special designs which suits your home and individual taste.

Our designs now include the most technically advanced energy saving glass available.

Patterned / Textured Glasses

The uneven surface of these glasses means we can apply lead, colour films and bevels only to a select range. Please ask for details.

All insulated glass units comply with BS EN 1279 Part 2 (air filled) and Part 3 (argon gas) and all toughened glass to BS 12150. All come with a standard 5 year warranty.
